# The app.pathRW02 "Game" Folder

An "app.pathRW02" folder is automatically created inside of your desktop "Rink Writer" folder the first time you run the software.

The "app.pathRW02" folder contains all of the data for your RinkWriter folder.

All of your "Team Names" are stored inside of the "RWTeams" file.

Your rink-side scorekeeper may never need to know about any of these folders because they are created and updated in the background when you run the RinkWriter software.

This is important **"ONLY"** for **importing "ALL" team rosters**.

When you import "All" team rosters (optional), you will be instructed to replace the "RW Teams" file and the "HS" folder with new ones. Only then is it important to know where they are located.
