The Rink-side Computer Setup

RinkWriter®

For security and portability you may wish to create a "kit" for storing and transporting your computer and printer.

Luggage works well as a carrying case:	A black-and-white laser printer works well and fits inside of your luggage:	A notebook computer, along with its electrical cables, a mouse, and a mouse pad, may also fit in the luggage:

It is advisable to use an external mouse.

If you print the "Pregame Rosters" and the "Game Worksheet" prior to arriving at rink-side, then you would only need a printer for printing the game "Scoresheet".

You could upload the scoresheet to the RinkWriter Scoreboard and print it at a remote location... like at the arena's main office.

You will need the Internet if you are uploading your scoresheets to the RinkWriter Scoreboard. Most arenas have access to the Internet. If no Internet is available, a cellphone "Hot Spot" makes a good Internet connection.
