'Shots on Goal' are shots that would go into the net if they were not stopped or deflected by the goaltender.

A 'Quality Scoring Chance' is usually considered to be a very good chance for a team to score a goal. It may or may not include a 'shot' on goal. It is a subjective decision made by the scorekeeper(s).

The team 'Winning the Face-off' is usually considered to be the first team to gain clear possession or control of the puck after the draw or face-off.
