The "Game Final" is the default.

Click here if you are printing your scoresheet at any other time during the game. It will automatically display the period and the time remaining in the period after the last goal or penalty. You may manually enter a period and the time remaining if you choose.

Use the **same PDF file name** throughout each game. Each new period will replace the previous period.

Upload each period the same way that you would upload the "Game Final". Each period will be replaced by the following period....or by the "Game Final".
