The Game setting is automatically printed as entered per game.

Blanks for Game #, Date/Day, and Game Times are provided for tournaments.

You may use any available roster to enter your Starting Lineups.

However, this works well because the rosters shown here match the rosters already stored in your computer's memory (in your app.pathRW02 folder).

Have the coach indicate who the six starters are. Also, have the coach mark any scratches or additions.

If preferred, forwards may be designated as "LW", "RW", and "C".

The Team Rosters as they were stored in your computer when this was printed.

This printout works great for marking the pronunciations of player's names.

For tournaments...as soon as the participating teams have been determined it is helpful to preprint the Pregame Rosters for each game...

. This provides the scorekeeper with information regarding the next game...the Home/Away designations, game times, and game numbers.
